-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to RCE received on Sep. 23, 2005. Claims 2-7, 9-14 and 16-24 were canceled. Claims 1, 8 and 15 were amended. Claims 1, 8 and 15 are pending examination.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 – 21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

MPEP 2106 IV.B.2.(b)

A claim that requires one or more acts to be performed defines a process. However, not all processes are statutory under 35 U.S.C. 101. *Schrader*, 22 F.3d at 296, 30 USPQ2d at 1460. To be statutory, a claimed computer-related process must either: (A) result in a physical transformation outside the computer for which a practical application in the technological arts is either disclosed in the specification or would have been known to a skilled artisan, or (B) be limited to a practical application within the technological arts.

2. Claim 1 in view of the above cited MPEP sections, is not statutory because they merely recite a number of computing steps without producing any tangible result and/or being limited to a practical application within the technological arts. The use of a computer has not been indicated.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2157

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 8 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Robertson et al., U.S. Patent No. 6,486,895 (referred to hereafter as Robertson).

Robertson teaches the invention explicitly as claimed including a system and method for browsing electronic books through a webpage (see abstract).

As to claims 1, 8 and 15, Robertson teaches a method performed by a computer system and a program product comprising:

storing an electronic version of a paper paper, wherein the digital version is displayable on a display device as a likeness of a hardcopy version of the paper (see col. 5 lines 37-col. 6 lines 57, electronic version of a book is stored); and

in response to content of a first portion of the likeness forming a hyperlink reference and embedding the hyperlink reference within the first portion of the likeness, wherein the hyperlink reference is associated with a second portion of the likeness such that when the first portion of the likeness is displayed on the display device, the first portion of the likeness is selectable by a user to cause the computer system to display the second portion of the likeness on the display device (see col. 5 lines 37-col. 6 lines 57, the book is referenced as pages where each page correspond to a webpage with a separate link address), and

wherein the content is at least one of the following: a page number at which the second portion of the likeness is located within the paper; and a title of the second

Art Unit: 2157

portion of the likeness (see col. 6 lines 15-30, the webpage also includes a page number).
